## INTRODUCING GLORY

Glory is another of our collections inspired by the beauty of nature. The perforated metal shade carries a recurring motif of the lotus flower, which has become a symbol of purity and rebirth thanks to the shape of its bloom, scent and color. The lotus grows from the muddy soil through the water surface, on which it develops its rich bloom. The path of the Lotus to reach the Sun's rays then symbolizes the spiritual development of a human being. Glory will bring a touch of nature and harmony to your interior. The Glory collection offers great variability of different designs, color combinations of surface finishes and some types can be complemented by glass bubbles, which complete the illusion of the path of the lotus flower through the water surface. Each of the surface finishes color option you see in this presentation is available for any type of Glory lighting fixture.

# ABOUT ARTGLASS

**ARTGLASS is a producer of original and design-led lighting made from high-quality materials**

ARTGLASS Ltd. is a producer of original and design-led lighting made from high-quality materials with a high proportion of manual craftsmanship. ARTGLASS has been active in the market for almost 30 years and operates with great success in 45 global markets.

The company works very closely with renowned Czech glassmakers and world-famous designers. ARTGLASS's great strength is the company's inhouse team of progressive designers, whose original and unique ideas in terms of high-quality design now adorn countless interiors around the world.

ARTGLASS's production programme can be divided into into three branches:

- custom lighting - lighting projects for private residences, religious buildings (churches, temples, mosques), restaurants, hotels, etc.

- the production of traditional Czech crystal chandeliers

- modern design collections of lighting fixtures

We offer our clients a comprehensive solution for lighting, from the design and consultation phase through to advice and assembly. We also have a specially trained team of assemblers who install our products in clients' premises around the world.

## PRODUCTION

ARTGLASS is constantly investing in its development, new technologies and the skills of its employees. Lighting designs and models are created in our own design studio, which is equipped with state of the art technology.

Using 3D software we are able to visualise the entire installation in its interior. We then elaborate on this proposal down to the last detail, including the preparation of technical documentation for production itself.

The company has a modern metal workshop where our specialists are able to construct even the most demanding metal structures for our installations.

All of our products meet the required standards and regulations and are certified by renowned global testing laboratories.
